

Object

```
classDiagram
    class Object
    class Node {
        accept:
        name
    }
    class Workstation {
        accept:
        send:
    }
    Object <|-- Node
    Node <|-- Workstation
```

The diagram illustrates a class hierarchy. At the top is the 'Object' class. Below it is the 'Node' class, which inherits from 'Object' (indicated by a vertical arrow with an open triangle head). The 'Node' class has a method 'accept:' and an attribute 'name'. At the bottom is the 'Workstation' class, which inherits from 'Node' (indicated by a vertical arrow with an open triangle head). The 'Workstation' class has methods 'accept:' and 'send:'.

Node

accept:
name

Workstation

accept:
send:
